Brad,

I agree with the decision for [] since most of the chemicals were non detect in interior. But for home [] TCE was consistently detected in 3 areas in interior and in bathroom TCE level is 0.35 ug. Please include this home for pressure test as we know sewer gas TCE fluctuates considerably.

Bhooma

No, we do not intend to perform pressure tests since all of the indoor air samples exhibited concentrations less than the IDEM RCG screening levels.

Sincerely,

As these two homes had elevated VOC levels in the laterals, did you perform pressure tests?
 Thanks.

Carolyn

Good morning. I would like to confirm that we are OK to send out letters to the Ex. 6 Personal Privacy (PP) property owners. We are stating that all crawlspace and indoor air samples were below the RCG Residential Screening Levels and that a follow up sampling event will occur during the Winter season.

Thanks and have a great Thanksgiving Holiday.

Sincerely,
